Some Points from a Man Who Believes That the Pleasures of Anticipation Are Greater Than Those of Participation - Joys of the Mental Tourist.

I wonder if any body but myself ever took a time-table vacation, asks Luke Sharp in the Detroit Free Press. It is such a cheap and delightful way of getting round about this little world of ours, that those who have never indulged in one have missed a

great deal of inexpensive pleasure.

I have knocked about quite a bit in my time and have seen several places besides Detroit, yet those actual journeys are nothing to my time-table trips.

For instance, the first part of this winter I thought I would like to go down to the City of Mexico. I at once went to a passenger ticket office in Detroit and began to make mquiries and load up with timetables. One of the great advantages of living in America is that you get your time-tables for nothing. Now, in England they make you pay a penny for even the smallest time-table of a railway. It is true that some of the larger railways give you quite a book for the money. You get all particulars of how much it will cost to ship a herse from one part of the country to another; what the tariff on dogs is; what the rules and regulations of the company happen to be: what the law is if you sass a station-master, and what various things you will be fined forty shillings for, but all this knowledge is useless to the ordinary man. He prefers to have his penny.

The railroads of America, on the other hand, flood the country with time-tables as free as the waters of the Detroit riverthat is, unless you get the water through the pipes of the Water Board.

The men in the Detroit ticket offices are beginning to know me pretty well by this time, and they do not rush away from a cash customer in order to attend to my wants. They know that I am a person who asks a great many questions, but who seldom buys a ticket. I think they believe that I am something of a fraud, but my intentions are honorable. For the time being I really believe that I am going to all those places that I inquire about. Take the brief course of the City of Mexico fever, for instance. I got the time tables of the Wabash railroad to St Louis; then the Iron Mountain road to the borders of Mexico and the Mexicar Central railroad through to the City of Mexico Then I got another time-table by way of Cincinnati; then the Queen & Crescent route to New Orleans, then the Southern Pacific and so on to Mexico. After that I found that I could go to Galveston and take a steamer there to Vera Cruz and go over the New Mexican National road to the cap ital. Or I could go on to San Antonio by rail and down that way to the National road

I then set to work to compare the dif-ferent advantages of the different routes. I had great di fliculty in making up my mind which I would take or wheth would go one way and come back the other. There were the delights of visiting the aucient and historical city of New Orleans Gaiveston had many attractions, and at San Antonio I could see the ruins of the Aiamo. How I did revel in all those places. I got books about them and posted up. Then I read all I could lay my hands on respiriting Mexico and what was to be seen there. I found out how much it would cost to go up the big mountain and learned that the guides expected five dollars a day and thought they would be disappointed in their expectations when they struck the under signed. I got many points on what the cost of living would be and figured up how much time I could spend on the trip.

After that I did what most people of a sensible nature would have done at the first. I figured up the cost.

Then I gave up the trip. I don't expect that the aforementioned sensible persons will enter into my enthu siasm on the time-table trip business, but then thoroughly sensible people miss s lot of fun in this world. Anyhow, they don't amass as many time-tables as I do.

Although, as I said before, they charge for their time-tables in Europe, there are many advantages there in the way of taking a time-table trip that are not to be had in America. For a shilling or two a man can get a book containing every time-table in Europe. Then by a further expenditure of cash he gets, one by one, the valuable guide ocoks of every country there, neat and compact and with a red cover. All this makes a time-table vacation easier and more instructive in Europe than in America. There is another great advantage there for the mythical tourist. The rali-way time books and guide books in Europe are made for the people; in America they are made for the railroad companies. For instance, you can't get the rates of fare in an American time-table or railroad guide. I never could understand why it is that the railroads of America are so anxious to con-ceal their fares from the people. Bradshaw's very complete book gives every railroad fare in Britain, and costs only fd. appleton's railroad guide gives no fare at all, and I imagine does not give a map unless the railroad pays for it. I wanted to find out about the steamers of a large steamship line on my trip to Mexico. There I suppose that line refuses to advertise and so the traveler gets left. Baedecker's guide book gives the names of almost every hotel in Europe and tells honestly whether it is good or bad. It gives the prices by the meal or by the day. The guide took will so-cept no advertisement of any kind at any price. It is a book made for the people and

it can be depended on.

There is nothing of that kind in America However to the mental tourist all this makes no difference. It is as cheap to stop, "in your mind," at a first-class hotel as a

pher says that the pleasures of anticipation are greater than those of participation. If that is the case I commend my plan of truveling. A time table tourist has all the time and the participation of the part MISCELLANEOUS.
